Green Benefits

Earthen Dinnerware are one such cradle-to-cradle product with numerous valuable environmental benefits:

- Fallen leaves prove to be a naturally Renewable Raw material. No trees are cut or harmed in the making of this dinnerware.
- This dinnerware is naturally biodegradable just like any other leaf fallen from a tree.
- The dinnerware is 100% natural and chemical-free. No glue, dye, or polish used. Sterilized by heat and water.
- Can be disposed in compost along with kitchen / yard waste. Produces rich compost and when further used, returns nutrients to the soil. Approved by [Victoria Compost Education Centre](#).
- All our packaging is Oxo-biodegradable making this a zero-waste product.
- Encourages community and backyard composting and increases environmental awareness among communities. For Vancouver community and Compost pick up check out [Growing City](#)

Palm Leaf										
Paper										
Plastic										
Styrofoam										
PLA										
Bamboo										

According to Victoria Compost Education Center, palm leaf dinnerware is ideal for backyard or community composting and composts better than bio-plastics.

Vancouver based Growing City has been happy to accept palm leaf plates in their compost pick-up program for offices and events.
